ESI Group, Rungis, France, (ISIN Code: FR0004110310, Symbol: ESI), today releases its sales and results for the half year 2022 (period from January 1<sup>st</sup> to June 30<sup>th</sup>) approved by the Board of Directors on September 6<sup>th</sup>, 2022. Limited review procedures on the interim consolidated financial statements have been completed. The auditors are in the process of issuing their reports.

**Cristel de Rouvray, Chief Executive Officer of ESI Group, comments:** “During H1 2022 ESI Group built considerable momentum for the 3-year “OneESI 2024 – Focus to Grow” plan. We achieved significant progress in both, growth of recurring software licenses, and profit and sharpened our strategic focus. This includes divestitures and a global initiative to package, price, and increase value across our offerings. This momentum enabled us to continue to attract highly talented individuals across the company. We expect improvements in our growth through increases in Annual Contract Value and through New Business to start in FY 2023 and to improve our financial performance over the next few years. We will provide an in-depth update on this progress and the 3-year plan at our upcoming investor conference. Overall, I am confident that we are on the right path for meeting all our stakeholders’ mid and long-term expectations.”

### Half-year revenue growth driven by the licenses recurring business

Half-year revenue rose by 5.5% (+4.0% at constant exchange rates) to €84.3 million. This growth was mainly led by the licenses business at €73.9m (representing ~88% of semester revenue and growing by 5.6% YoY, +4.0% cer). Recurring revenues (Licenses excluding perpetual contracts and before deferred revenue) increased by 7.5% (+6.1% at constant currency) to €75.0 million. The recurrence rate was 93.5% compared with 92.2% in the first half of 2021. 5.2 million came from perpetual contracts versus €5.9 million and deferred revenue is €6.2 million (€5.6 million in 2021).

All geographic regions grew in the first half of 2022 at constant exchange rates: Americas +6.0%, Asia +4.1%, and EMEA +3.3%.

H1 licensing revenue growth was led by the Automotive industry, further fueled by a strong growth in aeronautics, mainly driven by the Group's key customers in the Americas.

This performance illustrates the capability of the Group to navigate a complex macroeconomic context while continuing to deliver on its commitment. It demonstrates the reliability of ESI solutions and the strength of the Group's relationship with its key customers allowing sustained growth.

### Higher margins and profitability as promised

ESI Group delivered both revenue growth and a significant profit increase.

Adjusted EBIT improved by €7.1m to €25.6 million (+ 38.2%). Adjusted EBIT margin, stood at 30.4% vs 23.2% in H1 2021.

Total costs to adjusted EBIT decreased by 4.4% mainly led by a decrease in Staff costs in line with a headcount decrease from 1,188 (end of June 2021) to 1,078 (end of June 2022).

As previously announced, restructuring costs mainly provided for at year-end 2021, and other operating income and results totaled €1.5 million in the first half of 2022. ESI Group continues to deliver on its commitment, to growth, and enhanced profitability, through effective changes to organization and processes to generate maximum efficiency.

The combination of higher revenue and lower costs pushed the net result to jump by 26.5% to €14.0 million.

The seasonality of the activity of ESI Group is to be considered here, as H1 captures a large part of the revenue growth & in H1 there is a positive impact of R&D capitalization of €1.8 million net of related capitalized projects amortization due to the rhythm of releases in June and the impact of the exceptional depreciation in 2021 which reduced the level of depreciation.

<sup>6</sup> Gearing: net financial debt /Equity

## A healthy financial situation: No net financial debt as of the end of June

ESI Group's net financial debt decreased to -€0.6m versus €6.8m end of June 2021 and €12.5m end of December 2021 thanks to a robust cash-flow generation and despite higher loan repayment in H1 2022 versus 2021 and the one-off restructuring costs. The cash position stood at €35.4m versus €36.2m at the end of June 2021. The gearing (net financial debt /Equity) pursued its decrease and stood at -0.7% versus 6.9% in H1 2021 and 17.2% at the end of December 2021.

## 2022: very active continuation of the implementation of the strategic plan "OneESI 2024 – Focus to Grow"

ESI Group is undergoing a significant transformation, focusing on core activities and changing its organization to be best-in-class in terms of customer satisfaction, winning new business and employer brand by attracting the best talents in the market. All the Group's teams are mobilized to execute the plan in order to deliver on its commitment. These first positive signs are encouraging and show that ESI Group is on the right track.
